

Saja Abu Hussein

Phone: +96178970271 | Email: sajaabohossein@gmail.com | Location: Tripoli, Lebanon.

Professional Profile:

A dynamic and bilingual (Arabic & English) software developer with hands-on experience in mobile app development, front-end and back-end programming, and user-centered design. Possesses a solid foundation in Artificial Intelligence and Cybersecurity, with a focus on bug bounty and web security. Passionate about building intuitive digital experiences and exploring emerging technologies.

Core Skills:

- **Languages:** React , Java, Python, C/C++, C#, HTML, CSS, JavaScript, PHP.
- **Tools & Frameworks:** Android Studio, Visual Studio Code, Figma, GitHub , Google Colab (ML), Roboflow, CVAT, Chatling.
- **Technologies:** Shell Scripting, Virtual Machines.
- **Concepts:** Data Labeling, Model Training , Image Annotation, Data Structures & Algorithms, Agile, UI/UX Design, Operating Systems, Network Security, Testing & Debugging.
- **Soft skills:** Communication, Creativity, Teamwork, Leadership, Public Speaking, Strategic Thinking.

Professional Experience:

Web Security Intern – Hash – Remote

April 2026 – Present

- Developed a Python-based Web Cache Detection & Exploitation Tool for automated identification of cache-related vulnerabilities. (Web Cache Poisoning, Web Cache Deception)
- Implemented detection techniques for cache poisoning attack vectors and enhanced accuracy through validation mechanisms.
- Conducted HTTP traffic analysis and security research to assess web application caching behavior and identified potential security risks.

Frontend Developer – Tomkulak Consortium | Canada - Remote

January 2026 – Present

- Developed a React web application for monitoring and analyzing critical infrastructure across British Columbia, Yukon, and Alberta. The project leverages Android Studio to test and optimize the app for mobile environments.
- Built an interactive dashboards, network visualizations, and analytical interfaces to support resilience and failure-impact assessment.
- Collaborated with backend developers to integrate APIs and deliver responsive, user-friendly experiences across devices.

Administrator Officer – Innovation Lab | United Nations Relief & Work Agency for Palestine Refugees in the Near East (UNRWA) | Lebanon

October 2025 – December 2025

- Handled administrative operations and managed applicants' data using Excel and other digital tools.
 - Organized, reviewed and shortlist applications based on candidates' majors, skills, experience and supported the selection of suitable applicants for various areas within the Cash for work program.

UI/UX Designer | Intelligile Company, Lebanon

May 2024 – July 2024

- Applied UI/UX design for web and mobile applications using Figma and created intuitive and visually appealing interfaces.
- Developed skills in collaborating with cross-functional teams to ensure seamless user experiences and incorporating feedback for design improvements.
- Acquired hands-on knowledge in testing and debugging to enhance application performance and usability.

Projects:

- **E-commerce Web Application :** Built a modern e-commerce web application for a Korean skincare brand (Seoul Aura), focused on clean design and intuitive user experience. The platform features product browsing, curated collections, and responsive UI components to effectively showcase products across devices.
- **Chatbot Development:** Built an Instagram chatbot using **Chatfuel** to automate FAQs, streamline user interactions, and improve customer engagement through personalized conversation flows.
- **Hand Gesture Detection Model:** Built a machine learning model for real-time gesture recognition with potential applications in sign language translation and smart home control.
- **Brain Tumor Detector:** Developed a CNN-based model to detect brain tumors from MRI scans with high accuracy.
- **Emotion Detector:** Created an AI tool to detect facial emotions using deep learning and computer vision.
- **Blood Donation App:** Designed a mobile app to connect donors and recipients, with location tracking and emergency alerts.
- **Coffee Shop Website:** Designed a user-friendly site featuring online orders, daily specials, and integrated payment options.

Education:

- Bachelors in Computer Science
Beirut Arab University, Lebanon. Graduated May 2025.

Certifications:

- Certified Bug Bounty Practitioner – Hash Academy | Feb 2026.
- AI Boot camp Graduate – Innovation Lab | DOT, Lebanon | Nov 2025 – Dec 25.
- Create a Lead Generation Messenger Chatbot using Chatfuel – Coursera | Aug 2025.
- Introduction to Generative AI Badge – Google Cloud | Aug 2025.
- AI for Business Professionals – HP LIFE | Aug 2025.
- IC3 Digital Literacy Certificate – Certiport | Dec 2024.
